THE ROUTE

CONTROL THE CENTER.
EVERYTHING ELSE OPENS UP.

01	**OPENING**	Clean plunge. Secure control before chasing value.
02	**BUILD**	Light the first mode while preserving a repeatable feed.
03	**STACK**	Bring multiball close, then layer scoring under protection.
04	**CASH**	Convert the best repeatable shot at maximum value.

Know the machine. Play the margin.

DECISION SUPPORT

PLAY THE STATE.

SAFE	Take control. Test the return. Bank progress without forcing the center.
STANDARD	Build into multiball. Protect the danger. Cash the repeatable 3X shot.
DESPERATION	Abandon setup. Attack immediate value and accept volatility.

DANGER + RECOVERY

- Read the first center return before trusting a dead bounce.
- Nudge early enough to change the path - not after the outlane has won.
- When control disappears, shorten the route and take bankable value.
